

## Media release: SPARK ceiling lamp

### High-precision accent light in minimalist design

*The new SPARK ceiling lamp with integrated control gear complements the SPARK collection with a surface-mounted variant. Whether new construction or refurbishment, it can be easily mounted without the need for a cavity. With IP 54, it is ideally suited for wet zones and protected outdoor areas.*

The lamp convinces with proven lighting technology and excellent lighting effect. Optimal visual comfort is ensured by the high color rendering and perfect glare control. Four different beam angles can be selected as single color or tunable white variants. Different moods can be created with one and the same lamp: from a relaxing, warm-white candlelight atmosphere of 2200K, to an activating, cool-white workplace lighting of 5000K. High-quality LEDs provide excellent color rendering, regardless of set light intensity and light color.

The shapely, slightly conical ceiling light is available in the housing colors black, white and grey and fits harmoniously and timelessly into any interior. Excellent economy, functionality and durability are further convincing features of the ceiling light.
